

EXHIBIT

Miami Valley Broadcasting Corporation ("MVBC") is the licensee of receive-only earth station E110159.

One of the antennas listed on the authorization for E110159 is a Ku-band antenna, listed as 3) on the B) Particulars of Operations section on the authorization. This antenna, the 3-4.5M.SC2, should be deleted from the authorization.

Due to the constraints of IBFS Form 312 modification application, the form only allows for addition of new data, not removal of old.

MVBC requests the modification of its license E110159 to delete the Ku band antenna and to re-issue the license.

Amendment (Nov 2021) to SES-MOD-20211013-01717:

In addition to the above request for deletion of an antenna, MVBC also requests the deletion of two antennas that have been determined to be duplicates, the first and last entries on the E) Antenna Facilities section on the authorization. Please delete the 1-5.0M.ATC and 7.0 meter Simulsat antenna, in addition to deleting the 3-4.5M.SC2 as requested in the initial modification application (SES-MOD-20211013-01717).
