

Request for Withdrawal of Application - SES-ASG-20090729-00938

As the Commission is aware, on 7/29/09, the instant application ("Pro Forma Assignment" - File No. SES-ASG-20090729-00938) was filed requesting Commission consent to the pro forma assignment of the license of Earth Station E090006 (the "Station") from DRS Technical Services, Inc. to DRS C3 & Aviation Company. In that application, the parties advised that the Pro Forma Assignment had been filed because effective May 15, 2009 the engineering and logistics businesses of DRS Technical Services, Inc. (including the assets related to the Station) were spun-off to its affiliate DRS C3 & Aviation Company.

Subsequent to that filing, it was determined that the Station's facilities were not, in fact, transferred to DRS C3 & Aviation Company as part of such transaction and that the facilities should remain licensed to the existing licensee, DRS Technical Services, Inc. The filing of the Pro Forma Assignment was based on a good faith misunderstanding of the facts applicable to the spin-off. Because the facilities were not transferred as part of the spin-off, it is respectfully requested that the Pro Forma Assignment be withdrawn. The parties apologize for any inconvenience caused by the erroneous filing and subsequent withdrawal of the Pro Forma Assignment.

Respectfully submitted,

Nina Laserson Dunn, Secretary
DRS Technical Services, Inc.
