

**Form 312, Schedule A**  
**Exhibit F**

**Statement Setting Forth Facts Which Show how Assignment Will Serve the Public Interest**

Pursuant to the instructions to the instant FCC Form 312, assignment of these earth station licenses will serve the public interest.

The assignment will allow AEG Digital Media to offer a suite of transmission services to a variety of entertainment companies for digital transmission of live and other events. AEG Digital Media is a leader in providing these services to production companies in the Hollywood community for one-time events.

By operating these uplink earth station facilities directly, it will be able to offer a competitive alternative to other distribution and transmission providers both for one-time and recurring programming. AEG Digital Media intends to bring its production and distribution experience to utilize these facilities.
