

Antioch College Corporation
Earth Station E060293
Yellow Springs, Ohio
FCC Form 312
Schedule A
Exhibit F
July 2013

Public Interest Statement

Antioch College is the successor in interest to the educational institution at Yellow Springs, Ohio, which was founded in 1852 by the current licensee, Antioch University (which was originally known as Antioch College). Antioch will succeed the university as the operator of Earth Station E060293. The earth station is used in conjunction with the operation of Noncommercial Educational FM Broadcast Station WYSO, to deliver programming for broadcast to the public from such program suppliers as National Public Radio and Public Radio International. Antioch will continue the program service that the university has delivered to the Yellow Springs community and throughout the station's service area since WYSO first began broadcasting more than 50 years ago.

Antioch Mission

The mission of Antioch College is to provide a rigorous liberal arts education on the belief that scholarship and life experience are strengthened when linked, that diversity in all its manifestations is a fundamental component of excellence in education, and that authentic social and community engagement is vital for those who strive to win victories for humanity.

Program Service

WYSO is "Public Radio for The Miami Valley." It is a member of National Public Radio, broadcasting NPR's award-winning news and public affairs programs. WYSO also delivers live and prerecorded local news and public affairs programming produced by its professional staff, interns, and volunteers. Antioch will continue the present program service provided by WYSO.

Grant of the instant application will serve the public interest because it will enable WYSO to continue to provide an important program service to the general public, under the station's new ownership by Antioch College, the successor in interest to Antioch University.

Highlights of WYSO's program service include the following, many of which are delivered to the station by reception of signals via the earth station:

All Things Considered
Alternative Radio
BBC Newshour
BBC World Service
Fresh Air
Left, Right and Center
Living on Earth
Marketplace
Morning Edition
On Point

On The Media
Origins
Politics Ohio
