

Exhibit F

Public Interest Statement

The 181 earth station licenses that are the subject of this assignment application currently are being used to provide service to television stations across the country. Grant of this assignment application will allow the service to be continued without change but under the control of assignee NBC Telemundo License LLC. Inasmuch as assignee already has been approved to hold numerous earth station licenses (*e.g.*, E020061) and will operate the licensed facilities in the same manner as currently operated, FCC approval of this assignment application will serve the public interest, convenience and necessity.

Please note that 54 of the earth station licenses that are the subject of this assignment application currently are classified as common carrier and that 127 licenses currently are classified as non-common carrier. For purposes of Question 21 on FCC Form 312, the assignee checked the box for “common carrier” but does not intend that the classification of the 127 non-common carrier licenses be changed to common carrier. Following the consummation of this assignment application, NBC Telemundo License LLC intends to file applications to modify the 54 licenses classified as common carrier to change that status to non-common carrier.
