

Global Digital Media Xchange Inc.
FCC Form 312
Schedule A, Question A21, Exhibit F

This application seeks Commission consent to the assignment of the earth station licenses identified at Item A8 of FCC Form 312 Schedule A (the “Earth Stations”) from Warner Bros. Technical Operations Inc. (“WBTO”) to Global Digital Media Xchange Inc. (“GDMX”), which until recently was a corporate affiliate of WBTO. The Earth Stations are used in connection with the business and operations of GDMX, which provides production services, post-production services and distribution services and solutions to the motion picture, television and online video production industries. The Earth Stations are being assigned from WBTO to GDMX in conjunction with the recent acquisition of GDMX by Deluxe Entertainment Services Group Inc. (“Deluxe”).

GDMX will use the Earth Stations in the same manner and for the same purpose as they have been used by WBTO prior to the proposed assignment of licenses. Accordingly, grant of this application would serve the public interest by enabling GDMX to continue to deliver video content to its clients and customers following its acquisition by Deluxe.
