

**EXHIBIT F**

**Public Interest Statement**

Assignee Microspace Communications Corporation (“Microspace Communications”) is a pioneer in innovative broadband solutions for established and emerging enterprise applications, including digital signage, digital cinema, multimedia entertainment, corporate communications, radio broadcasting, wireless messaging and private data networks. As Microspace Communications currently is the holder of numerous earth station licenses, its qualifications to hold FCC licenses already have been passed upon.

Because the acquisition of E5605 will allow Microspace Communications to better serve its customers, Commission consent to the proposed assignment is in the public interest.
