

FCC Form 312

EXHIBIT F

APPLICANT—CABLE ONE, INC.

South Central Communications, Inc. (“SCC”) is proposing to expand its service territory by purchasing the Cable One CATV system in Page, Arizona. This system will be integrated into the existing SCC network that serves communities in Southern Utah and Northern Arizona.

With the acquisition of the Cable One CATV system in Page, Arizona, SCC will have the ability to expand its Utah-based communications network and bring high speed Internet services to the entire Page community, including business and residential customers. In so doing, SCC will be able to build upon the Applicant’s legacy of network investment, consumer-focused products and services, and innovative approaches to video pricing and packaging, and broadband connectivity to meet the internet speed demands of the customer base. The assignment of the Earth Station License and continued use of the Earth Station by SCC will assist in SCC’s deployment of high speed broadband services in the Page, Arizona which will serve the public interest.
