**Subject:** RE: FCC File No. SES-ASG-20180628-01524

Karl and Jeanette,

1. As I explained last week, TransMontaigne initiated the transfer of this license to PMI Services. Until September 2018, TransMontaigne operated the equipment in connection with its operation of PMI Services' MB Pipeline, at which time they were replaced by Ocelot Energy Management. As I mentioned, if the permit was mistakenly transferred to PMI Services instead of Ocelot, then please let us know what steps are necessary to rectify the error.
2. Officers and directors of PMI Services is shown in the first attachment to this email.
3. The ownership of PMI Services is shown in the second attachment to this email.
4. PMI contacts are shown below:
  - a. Darryn Tollefson; Vice President Midstream; office 713-567-0189; cell 713-598-1329
  - b. Alan Becerril; Commercial Manager; office 713-567-0185; cell 713-376-4817

Please advise if any other information is needed.

Darryn Tollefson
