Re: **Application for Authority to Provide Service from the EchoStar 1 Satellite at 77.15° W.L.
File No. SES-LFS-20090130-00106**

Dear Ms. Dortch:

Pursuant to Section 1.65 of the Commission's rules, 47 C.F.R. § 1.65, EchoStar Satellite Operating L.L.C. ("DISH") submits the following updated information for inclusion in the above referenced application file. The application requests authority to provide service from the EchoStar 1 satellite operating at 77.15° W.L. under Mexican authority.

At the time this application was filed, DISH anticipated that the EchoStar 1 satellite would be available for relocation by April 15, 2009, and would reach 77.15° W.L. on or around May 22, 2009. DISH now expects that the EchoStar 1 satellite will begin relocating to 77.15° W.L. on or around June 7, 2009, after the EchoStar 5 satellite arrives at 148° W.L. and traffic is transferred. EchoStar 1 is expected to arrive at 77.15° W.L. between July 15 and August 17, 2009.

We respectfully request that this information be incorporated into the above referenced files.

Sincerely,

Petra A. Vorwig

Counsel for EchoStar Satellite Operating L.L.C.
