To Whom It May Concern:

This letter is in reference to a call sign E010247 which is supposedly assigned to our school district. Please be informed that we have no such call sign. We do not operate anything that would require a call sign. We have no idea what this call sign is attached to.

I have made numerous inquiries regarding this as I received a bill for the "UNKNOWN" service dated May 12, 2005. I called 1-877-480-3201 and spoke with Judith Haley. I requested in writing an investigation and sent the request via e-mail to Judith on 6/7/05. I received no reply or further information until today. A call was received and sent to our technology specialist, Soren Stoutner. He was told that we needed to write another letter – which I am doing. Please follow through on this letter.

Again – let me state we have no call number. I was told by Judith that the registration was for an Earth Station, registration of a hub station. We have no satellite. Our school and district is only 4 years old. During our first year of operation – August 2001 – August 2002, we leased Internet Access through a corporation called Foundations Communications. We did not own any of the equipment, but paid a monthly bill. This company did install a satellite – but we did not own it. You probably need to contact them regarding this call sign. Their address is: 9379 Technology Drive, Rogers, AR 72756.

Please resolve this confusion. If I can be of further assistance, contact me by phone.

Respectfully,

A handwritten signature in cursive script that reads "Toni T. Wayas".

Mrs. Toni T. Wayas
Superintendent
