Re: Application of Maritime Telecommunications Network, Inc.
Call Sign E010332
FCC File number SESLIC2001113002259
Dear Secretary Dortch:

On January 28, 2004, Wm. Howden and Andrea Kelly of the Satellite Division, International Bureau, initiated a conference call to Mr. John Forsey, Director, New Satellite Ventures & International Coordination, Telesat Canada (“Telesat”); Mr. Robert Hanson, Maritime Telecommunications Network, Inc.; and Mr. Raul R. Rodriguez, Leventhal Senter & Lerman PLLC, representing Maritime Telecommunications Network, Inc., in connection with the above captioned application, which is contested by Telesat. The purpose of the call was to advise the applicant that a value for input power density listed in an analysis served on Telesat was materially different from the value provided in Maritime Telecommunications Network’s applications by an amount that suggested a typographical error, possibly a missing minus sign, in the analysis. No response was invited and the call was concluded with a request by Ms. Kelly that Mr. Rodriguez memorialize the conversation in a short filing with the Commission that would also be served on other parties to this application.

Sincerely,

William Howden, Branch Chief,
Satellite Division, International Bureau
