Subject: Earth Station Certification

Reference: Licensee Raytheon Company
File Number SES-LIC-20030416-00490
Call Sign E030083
Date of License 06/06/2003

Dear Ms. Dortch,

Construction of this earth station was complete and fully operational within 12 months of the license grant. It will continue to remain operational during the license period. When no longer needed, the license will be submitted for cancellation. In addition, this earth station antenna meets the antenna performance standards set forth in Part 25.209 and is in full compliance with all special and general provisions of the license grant.

We respectfully request your acceptance of this certification of completion and commencement of operation. Delays in processing required notifications to the FCC have occurred due to personnel changes in our Raytheon FCC licensing group over the last several years. We are working diligently to identify all licensing issues and provide responsible oversight of Raytheon licenses.

Sincerely,

Karen Dyberg
