Re: Clarification of SWE-DISH Satellite Communications, Inc., FCC File Nos. SES-LIC-20030910-01236; SES-AMD-20040116-0057

Dear Ms. Dorch:

With regard to the Minor Amendment to the above captioned application filed yesterday with the Federal Communications Commission, the available downlink frequencies on the PAS 1R satellite over the U.S. are in the 10.95-11.2 GHz and the 11.45-11.7 GHz bands and, as such, SWE-DISH's request for use of the PAS-1R satellite would be for international use only and in such case would utilize those downlink frequencies. Further, with respect to the other five satellites with which SWE-DISH has requested authority to operate (Telstar 11, AMC 5, AMC 3 Telstar 6 and Galaxy 3C), this will reconfirm that use of those satellites would be for U.S. domestic use only and would utilize the downlink frequencies 11.7-12.2 GHz for this purpose. In providing this clarification, SWE-DISH's sole objective is to try to eliminate any confusion about the application in order to facilitate its prompt consideration by the Commission.

Sincerely,

Maury J. Mechanick
Attorney for SWE-DISH Satellite
Communications, Inc.

cc: T. Tycz, J. Martin, S.Ghavami, FCC Satellite Division

CERTIFICATE OF SERVICE
