Re: Application of Loral SpaceCom Corporation for Earth Station;
Call Sign: E040105 File Number: SES-LIC-20040210-00282

Dear Mr. Tycz,

Loral SpaceCom Corporation (Debtor-In-Possession) ("Loral") is responding your letter of July 23, 2004, requiring that additional information regarding the above application be sent to the Commission within 30 days of the date of this letter

The Loral application requests authorization to provide a data communications service delivering remote telemetry and control information from two locations in Spain to Hawley, Pennsylvania via the HISPASAT-1C satellite operating at 30° W. Loral clearly understands the process for a Non-U.S.-licensed satellite to gain access to the U.S. market by either filing a petition to be added to the Commission's Permitted Space Station List or, as in the case of a previous earth station applicant DC I II, Inc., who filed a license modification and was granted authority to access the HISPASAT-1C satellite. Loral filed its license application; Call Sign: E040105 and File Number: SES-LIC-20040210-00282, based on the grant of the license (E890197) modification to DC I II, Inc. to access the HISPASAT-1C satellite; and in doing so expected a routine grant of its license request.

Loral will be unable to provide the requested information by the deadline set in your letter and respectfully requests that it be given an extension until September 30, 2004 to provide the information. We are unable to provide the information by the deadline because much of the staff of Hispasat is on vacation until September 1, 2004. Input from the Hispasat staff is needed to provide the necessary information and assure its accuracy.

In addition Loral respectfully requests that the STA (File No. SES-STA-20040309-00339) granted on March 10, 2004 continue until the instant its license application is favorably acted upon.

Please direct any questions or correspondence concerning application to:
