Eleanor,
The 14(E) and 52(W) are the correct parameters. Thanks.

Regards,

Gil Estrella

August 24, 2004

Hello Mr.. Estrella,

You request that your License be corrected to the technical data that was filed on your application for the Remote Antenna Elevation East and West of 14(E) to 52 (W)degrees, but on your Form 312 application for the remote antenna elevation East and West it states 14(E) to 51(W)degrees, when I correct this License I want to make sure the information is correct this time ok, so which is correct for the West Elevation Degrees?

Thank you
Eleanor M. Lott

Eleanor,
Will do. Thanks again for all your help.

Regards,

Gil Estrella

Hello Mr.. Gil,

I can't seem to find out any answers with anyone around here because we are in the mix of moving from floor to floor in the next 2 weeks, so I will take care of it for you and send you another License when I get it corrected ok, also I am in class this week for 2 days, so just be patient and I will get it the way you want it to be.

Thanks

Eleanor M. Lott

Eleanor,

It was good talking with you last week. I was glad we were finally able to connect. I was wondering if you have found out anything in regards to our license and the misinformation associated with the remote units?

Thanks again.

Regards,

Gil Estrella

Mr.. Gil,

I am very sorry we could not connect with one another this pass week, but I am going on vacation next week July 26-30th, so I will try to get in touch with you when I get back in Aug. 2nd ok. bye

Thanks

Eleanor Lott

Eleanor,

I left you a voice mail yesterday so I thought I'd follow up with an email. I would still like to talk with you concerning the apparent errors in the License due to the IBFS TOOLS program you mentioned. I'd appreciate it if you would get back to me as soon as possible.

Thanks again.

Regards,

Gil Estrella

Hello,

I mailed your License out to you on June 25, 04, I don't no why you haven't got it, and for the information that is different on your license changes were made due to IBFS TOOLS that was run on your application for technical data correction to our rules for streamline application to be autograntd. We can talk about this when I get back to my office on Tuesday next week, because I'm gone for today.

Thank You
Eleanor M. Lott

Re: E040209

Bill,

I was able to find an "unofficial" copy of our VSAT license on the IBFS website. I was surprised that we were not officially notified that the license had been granted. Should we be receiving an official license at some point for our review?

The reason I ask is that some of the parameters are different than those on our application, specifically the elevation angles for the Remote units. We requested an elevation range of 14 (E) to 52 (W)degrees but the license copy indicates 32 to 22.4 and the same for the Hub, which is obviously an error. At first I assumed that the errors on the "unofficial" copy were generated by the automated system and we would have a chance for final review and comments. But since I hadn't received any official notification or license, I thought I had better check. Please advise.

Thank you very much.

Regards,

Gil Estrella
