Subject: Application Corrections

Dear Ms. Bryant,

I had my engineers review the documents you faxed to me on 29 April 2004 and they provided me with the following information.

File No. SES-LIC-20040428-00601

It appears that we inadvertently provided the incorrect operational frequency ranges. The system will only operate in the Standard C-band frequency ranges which are 5.925 MHz to 6.425 MHz.

My apologies for the errors and the inconvenience. Please let me know if you have any questions or need any additional information.

Regards,

Steve
