Subject: RE: Raytheon FCC application

Shahnaz,

Attached is the revised Exhibit A. We request that this exhibit replace the existing Exhibit A that was originally submitted with the application. There were some administrative errors on the original document. Please accept my apologies for the inconvenience. I will ensure that future applications are more thoroughly reviewed prior to submission.

I realize that there are currently other administrative errors on our FCC form 312 which is under review. Unfortunately, I will not be able to make those corrections until Wednesday, 11 Aug 2004. As I stated in our telephone conversation earlier today, the engineer who completed and submitted this current application, no longer works for Raytheon. We are struggling to overcome some of the transitional issues that have arisen from his departure. I will continue to sift through his paperwork to resolve this matter as soon as possible. I expect to submit the remainder of the information to you by tomorrow.

Again, I appreciate your patience, and help, with this matter. If you have any further questions or problems, please feel free to contact me at your convenience.

PM

Craig:

I agree with you, unfortunately I have so many questions about the application, It's a lot easier discuss over the phone rather than email. How about tomorrow around 11:00am, my time? Please let me know.

Shahnaz,

We have been playing phone tag, so I thought I would try you by email. If you send me the questions you have about our FCC application, I will find the answers and respond as soon as possible. If you would prefer you could always try me on my phone listed below again. Have a good day.

Best Regards
