Subject: California Channel Earth Station Application

Reference: SES-LIC-20040513-00698

Towanda:

Thank you very much for quickly getting back to us on the errors in our recently submitted application. I am The California Channel engineer working on this project and would like to forward to you the correct information in order to revise our application.

We would like to revise the application's EIRP (dBW) from 60.4 to 62.4. In addition we would like to revise the application's EIRP Density (dBW/4kHz) from 12.0 to 32.4.

I think this should correct the errors in the application.

Please contact me if you have any additional questions.

Thanks again for your assistance.

Best regards,

Steven Moreen
