Mr. James J. McGillion

Earth Station Application  
SES-LIC-20040622-00860  
E040277

Dear Mr. McGillion

This letter is about the above-captioned earth station application filed on June 22, 2004, on behalf of Metrovision. This application, upon our preliminary inspection, has been found to be defective, and is returned, hereby, to Metrovision as unacceptable for filing. The application is rendered defective, in the main, because when filed did not submit an Attachment for the Radiation Hazard Study, and Antenna Diameter on FCC Form 312 was omitted.

An E-mail letter was submitted to Metrovision requesting the above information on June 28, 2004, and as of the date above on this letter no responses was submitted, therefore your application is being dismissed and returned without any action taken.

In the event you should have questions, please call Mrs. Eleanor Lott, the undersigned, at (202) 418-0728 or e-mail at [www.Eleanor.Lott@fcc.gov](mailto:www.Eleanor.Lott@fcc.gov).

Thank you.

Sincerely yours,

Telecommunications Specialist
