43. Description. (Summarize the nature of the application and the services to be provided).

This network consists of the hub station and two (2) variants of remote terminals. The remote terminals include the .96m and .75m auto acquisition antenna systems. The remote terminals will operate within CONUS and will only operate on US licensed satellites as identified in the application. The satellite provider has provided an affidavit of concurrence that the antennas will not create interference as proscribed by FCC regulations for two (2) degree spacing. The VSAT network will provide data services.
