Subject: RE: Application Changes

Towanda, the corrections to our filing, SES-LIC-20050829-01184 are as follows: Questions 30, 31, 32, and 33 should have been left blank as the application is being filed for a non-common carrier.

We accept reducing the power .37db for EIRP/carrier of 76.13 to make the output power (Pt Watts) within acceptable limits at 449.7.
