**Re: Application of Lockheed Martin Corporation for  
Woodbine, MD Earth Station to Operate with the  
RPS-2 Satellite, File No. SES-LIC-20051108-01538**

Dear Ms. Dortch:

Lockheed Martin Corporation (“Lockheed Martin”), by its attorney and pursuant to Section 25.110(a) of the Commission’s Rules, 47 C.F.R. § 25.110(a), hereby provides the following clarifying information regarding the “receive” element of its above-referenced proposed transmit/receive earth station in Woodbine, Maryland. In its application, Lockheed Martin identified its proposed earth station as “transmit/receive” in response to Question No. 26 on FCC Form 312, as the station will uplink to Lockheed Martin’s RPS-2 satellite in the 6 GHz band and will receive radionavigation-satellite service (“RNSS”) signals from the satellite in the 1176 MHz and 1574 MHz bands. Specifics on the technical characteristics of both directions were provided in response to the information requests in Schedule B of the FCC Form 312. Lockheed Martin is providing this clarification, in response to a Commission request for additional information, to advise the Commission that it does not seek any independent or additional protection – beyond that to which it is entitled by virtue of its license from the Commission granting it authority to transmit from the RPS-2 satellite in the 1176 MHz and 1574 MHz frequency bands – for the reception of RNSS signals at the proposed Woodbine, Maryland station. Therefore, as it is Lockheed Martin’s understanding that there is no requirement to have an earth station license from the Commission to receive the RNSS signals transmitted from the RPS-2 satellite in the 1176 MHz and 1574 MHz frequency bands, the information in the application pertaining to these bands may be considered as having been provided for information only.

Ms. Marlene H. Dortch
