Re: This letter is to certify completion of construction, and commencement of operation of a Fixed Satellite Earth Station.

Name of Licensee: Living Proof Inc
File Number: SES-LIC-20060303-00344
Call Sign: E060077

TRANSMIT:

On May 17, 2006, technical compliance and antenna performance verification of the earth station was performed. Testing and verification was performed using the facilities, resources, and monitoring equipment of SES Americom. Commencement of service began May 17, 2006.

- The RF operating frequency is 14110.35 MHz.
- Horizontal transmit polarization is currently being used
- The emission designator is 230KG7W.
- EIRP is 52.20 dBW
- EIRP density (dBW/4 kHz) is 35.20 dBW

RECEIVE:

- On May 17, 2006, this station commenced receive operation.
- The RF operating frequency is 11810.35 MHz
- Vertical receive polarization is currently being used
- Receive designator 230KG7W.

These are the current operating parameters, but we may, at any time, need to operate on any of the 24 transponders, and their associated polarizations, within our licensed limits and satellite arc coverage, due to satellite loading and/or equipment failure requirements.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian Law".
