Subject: E960138 Illinois Bible Institute

Attachments: Radiation Hazard Analysis for Illnoise Bible.pdf

Towanda

Attached is the Rad Haz study for the above mention application.

In addition, please make the following changes per your email.

Ant Row 1
Max EIRP Output should be 52.2 dBW NOT 40.7

Delete
Frq Rows 1,2,5,6. These emissions are not valid or utilized at this site.

Change
Row 3 to Emission Designation to 200KGXW EIRP/carrier=39.00 and
dBW/4khz = 22.00 Bandwidth =200kHz Power Density =-11.5 dBw/4kHz

Change
Row 4 to Emission Designation to 300KGXW EIRP/carrier=40.70. and dBW/4khz =
22.00 Bandwidth =300kHz Power Density =-11.5 dBw/4kHz

Change
Row 7 to Emission Designation to 200KGXW Bandwidth =200kHz Change Row 8 to
Emission Designation to 300KGXW Bandwidth =300kHz

If you have any questions please contact me directly. My reach numbers are
below.

John
