

June 12, 2007

Marlene H. Dortch, Secretary
Federal Communications Commission
Office of the Secretary
9300 East Hampton Drive
Capitol Heights, MD 20743

Attention: Satellite Division, International Bureau

SUBJECT: Reply Comments of ViaSat, Inc., dated May 24, 2007
File No.: SES-LIC-20070322-00396
Call Sign: E060390

The referenced filing was accepted for Public Notice on April 4, 2007. We will address the reply comments of ViaSat herein. It is our position that the reply comment does not provide justification to halt the license grant. We request that the license be granted based on the substantial information already filed with the FCC.

Background

L3 has filed an affidavit signed by both Intelsat and SES Americom stating their acceptance of the technical brief and the proposed operational plan.

"ViaSat does not object to a grant of L3 Titan's application, however, the authorization should be appropriately conditioned¹

- (i) to limit the terminal from operating within a network of similarly non-conforming terminals, and
- (ii) to require L3 Titan to maintain tracking data consistent with the requirement in the Commission's rules for ESVs."

Viasat Comments

We have reviewed the comments filed by ViaSat and provide the following in response:

1. *"The commission should review the networking aspects of L3 Titan's proposed modem before it is employed in a Network"*
 - a. L3 Titan is willing to accept a condition for this single earth station license to limit the terminal from operating within a network of similarly non-conforming terminals. L3 Titan will file additional information in a future filing for VSAT or networked operations.

¹ Quote from Reply Comments of ViaSat, Inc., Dated May 24, 2007

2. *"Locational Record-Keeping Requirements Should Apply to a Single Antenna"*

- a. Should the FCC rule to require records for VSAT networks and/or for single earth stations, then the mechanisms specified by the FCC will be added to the system to ensure compliance.

We respectfully request that the FCC grant a license for a single earth station.

Regards,

A handwritten signature in black ink, appearing to read "Paul Moller". The signature is fluid and cursive, with the first and last names being clearly legible.
