**Re: File No.: SES-LIC-20070322-00396, Call Sign: E060390**

*band 283*

Ms. Dortch,

Several of the conditions of the grant, section H) Special and General Provisions of the license Grant<sup>1</sup> and section V of the Order and Authorization DA 09-587<sup>2</sup>, require additional development of the earth station, coordination with other parties, and other conditions. L-3 plans to complete all necessary developments and comply with all of the conditions prior to commencing operations of the terminal under this license grant.

Per the ordering clause (item e, section V, DA 09-587) we are specifying a person as a point of contact for discussing interference concerns with other licensees or U.S. Government agencies. We request a waiver of the requirement (item e, section V, DA 09-587) that the point of contact information be provided "within 30 days of the release of this authorization". As noted above, additional development is required prior to commencing operations of the terminal and as such we believe that the point of contact should not actually be necessary until operations begin.

**Point of Contact:**
