

## Statement re Need for Radiation Hazard Analysis

This application seeks to re-license up to 1000 Inmarsat C terminals that were previously licensed under call sign E000284. The original application for these terminals, filed by COMSAT Mobile Communications on June 8, 2000, contained a radiation hazard analysis, and there has been no change in the technical specifications for the terminals. Accordingly, there is no need to resubmit that analysis at this time.
