Re: Response to Letter DA 08-2285; File Nos. SES-LIC-20080918-01222 and
SES-LIC-20080918-01223

Dear Mr. Kotler:

Through this letter, SWE-DISH Satellite Systems, Inc. (“SWE-DISH”) responds to your letter of October 10, 2008. SWE-DISH hereby clarifies and confirms that the antenna patterns submitted with regard to the applications reflect measurements taken with the antennas that are the subject of these applications. Although in places in the applications we referred to a 1.2 meter antenna (and also mentioned 0.833 as a dimension, which may have caused some confusion), in fact the antennas are elliptical 1.2 x 0.833 meter antennas, and the antenna patterns for those antennas were the ones submitted with the original applications (and labeled 1,2 meters on those plots). I also wanted to confirm that SWE-DISH will not be reapplying for any of the dismissed frequencies, so that we seek only to operate these earth stations in the 11.7-12.2 GHz and the 14.0-14.5 GHz bands.

Thank you in advance for your prompt attention to this matter. Please let me know if you have any other questions.

Sincerely,

A handwritten signature in blue ink, appearing to read "Mark Steel", written in a cursive style.

Mark Steel
Senior Vice President of Engineering
