Re: New C-Band Earth Station E090162 SES-LIC-20090904-01130

This document is to make a correction on the above-captioned earth station application filed by Petrocom License Corporation. In the application, item E20 – FAA Notification, was incorrectly answered as “Yes.” Because the antenna structure is less than 6.1m, the correct answer is “No.” So no FAA notification is required.

Sincerely,

*/s/ Raul Magallanes*
