

EXHIBIT 7

Frequency Coordination

In connection with the ESV network proposed herein, Schlumberger Technology Corporation ("STC") is seeking authority to operate on up to 36 MHz of spectrum on each ALSAT satellite it uses. Pursuant to Public Notice DA 05-1671, released June 15, 2005, STC will notify the FCC by letter of the successful completion of its frequency coordination as completed for each area of operation.

EXHIBIT 8

Coordination with Another Country

In cases where the coordinating area for a particular operating area extends into the territory of another sovereign nation, Schlumberger Technology Corporation will provide the FCC with all necessary data required for coordination.
