

## List of Approved Non-Routine Earth Station Antennas

### AVL 2.4 Meter Antenna

The 2.4 meter antenna proposed in this application will operate with the same parameters as the earth station licensed under file number SES-MOD-20050412-00423, Call Sign E040442. The maximum EIRP density of 29.4 dBW/4KHz for the 2.4 meter antenna filed in this application will be same as the EIRP density dBW/4KHz filed in the E040442 application. All other parameter match the existing license.
