Re: *Convergent Media Systems*

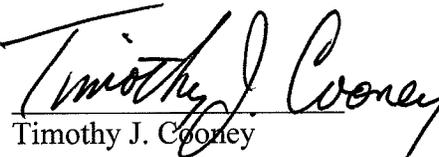

Dear Ms. Dortch:

This application is filed on behalf of Convergent Media Systems Corporation (“Convergent”) for a new license to replace the recently expired license for Ku-band earth station E000689. This application utilizes the same technical data as on SES-MOD-20031022-01453, with the exception of Item E36 where AMSL data were revised for consistency. Radiation hazard and power flux density exhibits are attached for each of the three sizes of antennas for which authorization is requested.

A separate request for Special Temporary Authority to continue operating under the parameters of E000689 is being filed concurrently.

Please contact the undersigned if you have any questions.

Sincerely,

Timothy J. Cooney
