Washington, D.C. 20002

Re: GCI Communication Corp., FRN 0001568880
Section 25.133(b) Submissions

Dear Ms. Dortch:

By this instant filing, General Communication, Inc. ("GCI") seeks to ensure compliance with Section 25.133(b) of the Commission's rules with respect to earth stations licensed to GCI and its subsidiaries. This section provides that upon the completion of construction, each licensee must file with the Commission a certification containing the following information:

- The name of the licensee;
- File Number of the application;
- Call sign of the antenna;
- Date of the license;
- A certification that the facility as authorized has been completed and that each antenna facility has been tested and is within 2 dB of the pattern specified in §§ 25.209, 25.135 (NVNG MSS earth stations), or § 25.213 (1.6/2.4 GHz Mobile-Satellite Service earth stations);
- The date on which the station became operational; and
- A statement that the station will remain operational during the license period unless the license is submitted for cancellation.

Please address any questions regarding this matter to the undersigned.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jimmy Sipes".

Jimmy Sipes
Vice President, Network Services & Chief Engineer

Section 25.133(b) Submission

<u>File Number</u>	<u>Call Sign</u>	<u>License Date</u>	<u>Operational Date</u>
SES-LIC-20120227-00219	E120041	5/25/2012	6/25/2012

Some antennas associated with Call Sign E120041 (noted above; specifically, the 0.6m, 0.75m and 1.0m SeaTel/Cobham Satcom antennas) are recognized as being non-compliant with 25.209 and was licensed as such per the instructions detailed in DA 09-425. As indicated in the license for this ESV network, GCI will operate these earth stations with reduced maximum power density into the antennas. The remaining antennas (specifically, the 1.2m, 1.24m, 1.5m and 2.4m SeaTel/Cobham Satcom antennas) are recognized as being compliant with 25.209. This ESV network is now operational and will remain operational during the license period, unless and until the license is submitted for cancellation. As per the application for this license and the requirements set forth in 25.222, GCI will collect and store information related to the ship location, transmit frequency, channel bandwidth and satellite used for each transmitter that is active/operational in the ESV network.
