

**Statement Pursuant to Section 17.14(a) of the Commission's Rules**

The 11 meter antenna that is the subject of this application is exempt from notification to the Federal Aviation Administration ("FAA") because the antenna is located in an area with multiple structures of a permanent and substantial character that are the same height or taller than the antenna itself. *See* 47 C.F.R. § 17.14(a). The antenna will be co-located with more than a dozen existing large transmit/receive earth stations that each have a height above ground level that is equivalent to or greater than the subject antenna. *See*, Aerial View of Site below and FCC Call Signs E4730, E940242, E940243, E940244, E970061, E970068, E970070 and E020201. Under these circumstances, it is evident that the proposed antenna will not adversely affect safety in air navigation.
