Towanda,

In schedule B, of the above application, I listed the EIRP and EIRP density levels as 0.0 in error for emission 36M0D7W for Transmit frequency range 5925-6425 MHz. The EIRP should be 65.01 and the EIRP density should be 25.47.

Please let me know if this response satisfies Trang's request or if I need to send this information in another manner.

Thanks ☺

*Cindy Lynch*
