

Description of Request

Planet Labs Inc. (“Planet Labs”) hereby requests authority to operate an earth station located at Thomas & Brown Hall, 1125 Frenger St., Las Cruces, NM 88003. The proposed earth station will transmit at 450.0 MHz, and receive at 401.3 MHz. The earth station will be in communications with the authorized Planet Labs Constellation of Non-Geostationary Orbit (“NGSO”) Earth Exploration Satellite Service (“EESS”) satellites.¹ The frequencies in this application have already been authorized for transmission and reception to and from the authorized Planet Labs Constellation for early-phase and emergency-backup telemetry, tracking and command operation (“TT&C”).² A number of earth station authorizations with the exact same technical and administrative characteristics have already been granted to Planet Labs for the same purpose.³

The 401-402 MHz band, which is authorized for Space Operations on a secondary basis for non-federal users, is used as a secondary TT&C space-to-Earth link.⁴ The 449.75-450.25 MHz band, which is authorized for space telecommand, subject to agreement obtained under No. 9.21, is used as a secondary TT&C Earth-to-space link.⁵ This site is a TT&C-only site and thus will not utilize any of the other authorized frequencies granted under Call Sign S2912.

Planet Labs transmissions will not cause harmful interference to Federal and non-Federal stations operating in accordance with the Table of Frequency Allocations. Planet Labs also accepts any interference to it that is caused by those allocated services.

¹ See File No. SAT-LOA-20130626-00087 (approved 12/03/13, Call Sign S2912)

² *Ibid*

³ See File No. ~~SES-LIC-20140318-00146~~ (approved 06/30/2014, Call Sign E140036), ~~SES-LIC-20140411-00282~~ (approved 06/25/2014, Call Sign E140040), and ~~SES-LIC-20140411-00283~~ (approved 06/26/2014, Call Sign E140041).

⁴ See 47 C.F.R. § 2.106; In the Matter of Orbital Imaging Corporation, DA 99-353, at ¶¶ 3,8 (1999).

⁵ See 47 C.F.R. § 2.106, footnote 5, 286 and US87

Additional Antenna Information

This Planet Labs earth station is comprised of two Yagi-Uda antennas mounted on a single cross-boom controlled by an Az/EI rotator. Details are as follows:

Table 1 Antenna Characteristics

Antenna	Manufacturer & Model	# of elements	Antenna Length (m)	Peak Gain (dBi)	3dB Beamwidth (deg)	Polarization
Uplink Yagi	M2 Inc. 450CP34	17	2.7	16.5	30	RHCP
Downlink Yagi	M2 Inc. 400CP30	15	2.7	16.5	30	RHCP

Table 2 Antenna Rotator Characteristics

Manufacturer & Model	Type	Mast Height (m)
Yaesu G5500	Az/EI	2.5

Table 3 Site Characteristics

Site Address⁶	Latitude	Longitude	Site Elevation (m)	Max Antenna Height (m)
Thomas & Brown Hall, 1125 Frenger St., Las Cruces, NM 88003	32° 16' 48" N	106° 45' 0" W	1199.7 AMSL	3.8 AGL/ 1203.5 AMSL

⁶ Site will be remotely operated from Planet Labs, 400 2nd St, Suite 101, San Francisco, CA 94107
