

## **Exhibit B**

### **Use of the 5850-5925 MHz band**

Use of the band 5850-5925 MHz is shared on a co-primary basis with Federal Government.

The applicant will comply with the provisions of footnote US245 and recognizes that this application will be subject to case-by-case electromagnetic compatibility analysis. Operations in this band will be limited to international inter-continental communications.

The applicant accepts that there is the potential for unacceptable interference to this earth station's communication links from radiolocation systems, including high-powered land-based transportable and ship-borne radar transmitters operating in the band.
