**Subject:** RE: SES-LIC-20150501-00284; Riverside, California Earth Station E150071

Ms. Grady

Your request for a waiver of the Section 25.133(b) requirement is hereby granted. Intelsat's new deadline for this station is November 10, 2016 at 3 AM Eastern Time. Please contact your commercial spectrum coordinator and advise them to continue protecting this location. A copy of this email will be retained in IBFS File No. SES-LIC-20150501-00284.

**Subject:** SES-LIC-20150501-00284; Riverside, California Earth Station E150071

Paul-

As we discussed yesterday, below is a request regarding E150071's construction period. Please let me know if you need anything further, or the request in a different format.

Re: SES-LIC-20150501-00284; Riverside, California Earth Station E150071

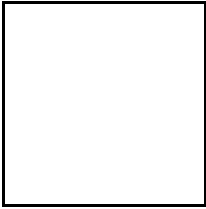

Intelsat herein seeks determination by the FCC, per Section 25.133 of the Commission's rules, that the period of construction for Intelsat's Riverside, California Earth Station E150071 be extended from 12 months to 18 months. The current period of construction will end on June 10, 2016, and Intelsat is seeking an extension until November 10, 2016.

The antenna is currently being constructed; however, because of the unusually lengthy permit process in Riverside County, Intelsat was unable to start construction until recently. This unexpected delay in the start of construction has delayed the construction completion date. Intelsat expects the Earth Station to be constructed and brought into operation by November 10, 2016, and will file a notification as required by Section 25.133(b).

Please feel free to contact me with any questions.
