

Response to Question E15

The antenna proposed in this application does not strictly comply with the antenna gain patterns specified in Section 25.209 of the FCC's rules, 47 C.F.R. § 25.209. The FCC has announced that non-routine antennas that have previously been reviewed and approved by the Commission do not need to provide the antenna radiation plots required by Section 25.132(b)(3) of the Commission's rules, 47 C.F.R. § 25.132(b)(3), but should instead provide an application file number and call sign of a license in which that type of non-routine antenna has been approved.¹ This AVL antenna proposed in this application has been previously reviewed and approved by the FCC. *See* File Number SES-LIC-20140312-00135, Call Sign E140035 (granted Jul. 28, 2014).
