Re: Amendments

Mr. Jose Trevino,

Thank you for bringing to our attention the calculation issues on the following files numbers, and the incorrect data being entered onto line E60 of the applications. The affected file numbers are as follows:

- 1) File Number: SES-LIC-20170127-00086  
Call-sign: E170021
- 2) File Number: SES-LIC-20170127-00087

We kindly ask that the following changes, identical to all applications above, be made.

1) E40: Total EIRP for All Carriers (dBW) should be changed to 75.09 dBW.

This is taking into account a 1.5 dB loss in the system which was overlooked in the original applications.

2) E48: Maximum EIRP per Carrier (dBW) under 36M0G7F should be changed to 75.09 dBW.

3) E49: Maximum EIRP Density per Carrier (dBW) under 36M0G7F should be changed to 35.527 dBW/4KHz.

4) E48: Maximum EIRP per Carrier (dBW) under 4M00G7F should be changed to 65.547 dBW.

5) E49: Maximum EIRP Density per Carrier (dBW) under 4M00G7F should be changed to 25.984 dBW/4KHz.

6) E60: Maximum EIRP Density toward the Horizon (dBW/4KHz) should be changed to -14.073 dBW/4KHz.

Thank you your consideration and attention to this matter.

Sincerely,

Brian Nelles
