Subject: RE: CBS Communications file number SES-LIC-20180626-01860 Call Sign E181132

Hi Trang Nguyen,

A thousand apologies... I now see where the problem lies. I provided an incorrect response on the Main Form, Question #25, "Type of Station." This application is for a TV satellite news truck so the answer to that question should have been "Temporary-Fixed Earth Station." Instead, I incorrectly entered "Fixed Earth Station." Is that easily corrected from your end?

Once it's understood that the Earth station can be virtually anywhere, you can see why I didn't provide answers for E3-14. After all, the coordinates, address, and site elevation will continually be changing. The screen-shot below is believed correct.
