

Exhibit for Construction Notification

Pursuant to the authority originally granted in File No. SES-LIC-19820816-00951, construction relating to transmit/receive earth station E4868 was completed more than 25 years ago. Since the original construction of the facility, no changes have occurred. The E4868 license was not timely renewed in 2018, causing the licensee to file for a new license, which was granted under the same call sign (E4868) in File No. SES-LIC-20180810-02193.
