

**FREQUENCY COORDINATION AND INTERFERENCE PROCESS**

Pursuant to Part 25.203(c) of the FCC Rules and Regulations, the satellite earth station proposed in this application is in the process of frequency coordination. TelAlaska Cellular, Inc. (“TelAlaska”) through its consultant, Monty R. Lee and Company has engaged Micronet Communications, Inc. (“Micronet”) to perform frequency coordination in support of this Application. Coordination data for this earth station will be submitted for review and approval prior to onset of construction.

An interference study considering all existing, proposed and prior coordinated microwave facilities within the coordination contours of the proposed earth station will demonstrate that this site will operate satisfactorily with the common carrier microwave environment. Further, there will be no expected restrictions of its operation due to interference considerations.

Micronet has provided its Prior Coordination Notice, PCN# M1830404. TelAlaska will coordinate any remote operations prior to bringing them into use as part of the C-band VSAT network.
