Response to Trang Nguyen email 10/23/19

I reviewed the associated license application to find that you specified an eirp density level, item E49, as -14 dBW/4kHz. That must not be the level of eirp density. Please provide a more sensible level. I calculated to have an average of 29.45 dBW/4kHz for the 36M0G7W emission carrier.

Correction:

1. Maximum EIRPDensity Per Carrier Item E49 correction **29.45 dBW/4kHz**
