Re: *SpaceX Services, Inc., IBFS File No. SES-LIC-20200402-00365*

Dear Ms. Dortch:

SpaceX Services, Inc. (“SpaceX Services”) has filed the above referenced application for authority to operate a gateway earth station in Charleston, OR. Unfortunately, in reviewing that application, SpaceX has discovered an error in the response to Item E11, which calls for the latitude of the proposed site. SpaceX indicated that the earth station would be located at 46°N when in fact it will be located at 43°N. The coordinates were correctly stated in the Comsearch report and narrative submitted with the application.

We apologize for any confusion, and request that you update the Commission’s records to reflect this correction.

Respectfully submitted,

Mary Shurtz
Global Gateway Site Acquisition Analyst
