Site coordinates are correct. This is a new teleport currently under construction so satellite map views aren't up to date.

I acknowledge and confirm lowering power to 46.2 dBW/4K.

Thank you,
Rusty Layton

Hi Rusty Layton,

We need to verify the following items in your application:

1. We are unable to verify location and presence of antenna. Please verify your antenna site coordinates.
2. PowDen (-2.2 dBW) on 14000-14500 36M0G7W exceeds Max Digital PowDen of -14 for ROUTINE PROCESSING per CFR 25.212. Please confirm lowering 58 dBW/4K to 46.2 dBW/4K.

Thanks.

Jae Lim
