**Re: File No. SES-LIC-20260407-00874**

Dear Ms. Dortch:

Attached is a copy of the notice letter submitted in File Nos. SAT-LOA-20190704-00057, SES-LIC-20210409-00634, SES-LIC-20210409-00635, SES-LIC-20210415-00685, and SES-LIC-20210730-01290 on May 30, 2023, informing the Commission of the coordination agreement that Iridium Communications Inc. (“Iridium”) and Kuiper Systems LLC, a wholly owned subsidiary of Amazon.com Services LLC (collectively, “Amazon”), reached relating to operation in the 19.4-19.6 GHz and 29.1-29.3 GHz bands (the “Iridium Coordination Agreement”).

The terms of the Iridium Coordination Agreement have not changed and apply equally to Amazon’s proposed operations in the 19.4-19.6 GHz and 29.1-29.3 GHz bands in the above-captioned application. Amazon therefore submits the attached copy of the May 30, 2023 notice in support of the above-captioned application. Should any questions arise concerning this submission, please contact the undersigned.

Sincerely,

/s/ Negheen Haya Sanjar

Re: IBFS File Nos. SAT-LOA-20190704-00057, SES-LIC-20210409-00634, SES-LIC-20210409-00635, SES-LIC-20210415-00685, and SES-LIC-20210730-01290

Dear Ms. Dortch:

Iridium Communications Inc. (“Iridium”) and Kuiper Systems LLC, a wholly owned subsidiary of Amazon.com Services LLC (collectively, “Amazon”), hereby notify the Commission they have reached a coordination agreement for the use of certain Ka-band frequencies. The parties’ agreement fulfills, with respect to Iridium, a condition of Amazon’s authorization to deploy and operate a non-geostationary satellite orbit (NGSO) system.<sup>1</sup>

Amazon’s NGSO authorization requires it to coordinate operations in the 19.3-19.7 GHz and 29.1-29.5 GHz bands “with any previously authorized NGSO MSS systems not included in the March 2020 Processing Round over the bands designated for use by NGSO MSS feeder links.”<sup>2</sup> Iridium is such an NGSO MSS system, and it uses a portion of these bands, *i.e.*, it uses the 19.4-19.6 GHz and 29.1-29.3 GHz bands, for NGSO MSS feeder links.

With today’s submission, Amazon and Iridium are pleased to announce they have reached a coordination agreement for operations in the 19.4-19.6 GHz and 29.1-29.3 GHz bands associated with the ITU filings identified below.<sup>3</sup> Now that Amazon and Iridium have reached a coordination agreement, Amazon withdraws its request that the Commission hold in abeyance the portion of the above-captioned earth station applications seeking authority to operate in the feeder link bands (19.3-19.7 GHz and 29.1- 29.5 GHz) pending completion of coordination with Iridium.<sup>4</sup>

---

<sup>1</sup> *In the Matter of Kuiper Systems LLC, Application for Authority to Deploy and Operate a Ka-band Non-Geostationary Satellite Orbit System*, Order and Authorization, 35 FCC Rcd 8324 ¶ 59(i) (July 30, 2020, call sign S3051) (requiring coordination in the 19.3-19.7 GHz and 29.1-29.5 GHz frequency bands prior to conducting operations in such bands).

<sup>2</sup> *Id.*

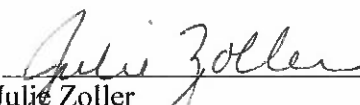

<sup>3</sup> The parties’ coordination agreement encompasses the following ITU filings: For Kuiper, USASAT-NGSO-8A, USASAT-NGSO-8B, and USASAT-NGSO-8C; for Iridium, HIBLEO-2FL and HIBLEO-2FL2.

<sup>4</sup> See Letter from Liliana Farfan Roach, Corporate Counsel for Kuiper Systems, LLC, to Marlene H. Dortch at 1 (Mar. 2, 2022) (on file in IBFS File Nos. SES-LIC-20210409-00634, SES-LIC-20210409-00635, SES-LIC-20210415-00685, and SES-LIC-20210730-01290) (asking, at the request of Iridium, that the Commission hold its earth station applications in abeyance pending coordination).

The completed coordination agreement ensures the coexistence of these two satellite operators to the benefit of consumers and businesses.

Dated: May 30, 2023
