

Re: Form 312 Application for New Satellite Earth Station

Vyvx, LLC, pursuant to Sections 25.110(b)(1) and 25.115(a)(1) of the Commission's Rules, is submitting with this letter an application on Form 312 for new transmitting earth station. Vyx, respectfully requests that the Commission assign call sign E960072 to the new station.

This application is intended to cover the facilities previously licensed under call sign E960072 (the "Station"), whose license inadvertently was allowed to expire. The earth station has remained under Frequency Protection by Comsearch and kept current with all licensed users in the shared uplink and downlink bands of operation.

Vyx has maintained this antenna under the parameters referenced in the FCC's International Bureau's DA 20-1260, released October 23, 2020 (the "Updated Incumbent List Notice"). Vyx asks that the Commission process and grant this application. The public interest will be served by a grant of this application, which will allow for continued service to Vyx's C-band clients.
