OPPOSITION

Telenor Satellite, Inc. ("Telenor") hereby opposes the Petition to Hold in Abeyance filed in this proceeding by Mobile Satellite Ventures Subsidiary LLC ("MSV"). Both Telenor and Inmarsat have responded many times to MSV's numerous requests that the Bureau defer action on Telenor applications pending completion of the international coordination process. We have nothing new to add on that score and will not burden the record by reiterating our previous comments. We do wish to clarify, however, that all we are seeking in this application (as in all previous Telenor applications filed over the last several months) is the ability to provide L-band services on a non-harmful interference basis in the absence of a new operating agreement that governs shared usage of the L-band. We are certainly not seeking authority to operate on any frequency currently utilized by MSV. MSV's implication to the contrary is not based on anything in Telenor's current application, but rather on Telenor's existing license, which permits operation in the 1545.8-1548 MHz band. Those frequencies are no longer needed for the FAA/WAAS program. Accordingly, the coordination requested by MSV is not required, and the

use of the 1545.8-1548 MHz band for FAA/WAAS purposes has no bearing on Telenor's current application. We understand, however, that portions of the 1545.8-1548 MHz band are being used by MSV, and that different portions are being used by Inmarsat. Thus, Telenor should have the ability to use any portions of the 1545.8-1548 MHz band segment currently being utilized by Inmarsat to serve the United States.

Respectfully submitted,

TELENOR SATELLITE, INC.
